

AIR ★ WATER ★ WASTE CONSULTANTS

April 29, 2009

IMPORTANT INFORMATION

Facility No.: RN100222413
TCEQ Notice: April 22, 2009
EIQ Due Date: **July 21, 2009**

ATTENTION: ENVIRONMENTAL COORDINATOR

RE: CALENDAR YEAR 2008 TEXAS AIR EMISSIONS INVENTORY

The Texas Commission on Environmental Quality (TCEQ) is completing its notifications to facilities required to prepare their 2008 Air Emissions Inventory Questionnaire (EIQ).

Our firm specializes in air quality services, including preparation of air permits, atmospheric modeling studies, air pollution control projects, etc. We have been preparing EIQ's for facilities here in Texas since the program began 25 years ago. We are highly regarded by the TCEQ and are well known for performing very high quality environmental services at reasonable prices.

The 2008 EIQ has new requirements about maintenance, start-up, and shut down (MSS) emissions and several new forms to complete. You will benefit in many ways by using our services to help you prepare this year's inventory, either on paper or electronically:

- ✓ **Your EIQ will be prepared correctly and on time by experienced professionals.**
- ✓ **All calculations, forms, tables, and diagrams will be re-analyzed and updated.**
- ✓ **Your inventory report will be detailed and of the highest quality so that it can be used for your future EIQ's, air permits, TRI reports, TCEQ inspections, etc.**
- ✓ **Your annual emissions fee may be reduced significantly. This fee is normally based on allowables unless actual emissions from a properly prepared EIQ are available.**
- ✓ **Most beneficial of all, your valuable time and manpower will be free for use on other important projects.**

Please contact Elizabeth Stanko or me by phone or e-mail for a verbal or written cost estimate to prepare your inventory. We guarantee that you will be very impressed with our outstanding services and our reasonable prices.

Sincerely yours,

Roberto Gasparini, Ph.D.
